Consulting

From our global offices, Cable Exchange are proud to be involved in groundbreaking social and economic programmes that help foster sustainability and stability across the globe. Cable Exchange bring global expertise and local knowledge to our work with federal, state and local government & non-governmental organisations, to support projects funding by international partners.

Our aim is to make a positive impact, for both public and private sector clients. We help develop the infrastructure, capacity and systems of governance required to rebuild fragile and conflict affected territories, to create jobs, improve opportunities and stimulate growth.

Cable Exchange, provide technical expertise and commercial insight to deliver property, assets & infrastructure projects. We combine multidisciplinary teams of consultants and first rate technical specialists from across our business to enable creative development and smart delivery at every point of a project lifecycle.

Knowledge

Our teams have wide experience delivering major development programmes, from public financial management and developing infrastructure, monitoring and evaluating projects. Together with a network of specialist associates, we support social inclusion and institutional reform.

When clients work with us, they experience a service that places their needs at the centre of all we do. We deliberately seek to work beyond our core disciplines so each of our client's visions can be delivered collaboratively with agility, professionalism, value and reliability.

Alongside our International Development, Planning & Transport businesses our expertise is broadly categorised into the following areas.

- Programme & Project Management
- Infrastructure & Build Environment
- Surveying & Asset Management
- Environment
- Project Financing

Working with Cable Exchange will enable you to access the right mix of expertise and create the team

“Some customers want us to manage the entire project scope while others have very strong views on how the project is to be carried out. Therefore it is necessary to be flexible to ensure project success for our customers.”
